***Election/Restrictions***

1. Applicant's election of Species I in the reply filed on 6/24/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4-7, 15-18, 26-29, and 38-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/24/05.
3. It is noted that claims 8 and 9 have been added to the office action as requested by applicant.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 8, 9, 11-14, 19, 20, 22-25, 30, 31, 33-36, and 46-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hammerslag (6289558), see figures 15-17.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3728

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 10, 21, 32, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hammerslag in view of Bouvier (6532688) or conventional knowledge.

Hammerslag shows a fastening system for footwear and suggests the use of the fastening system for any footwear (see column 4 lines 39-44). Bouvier shows an example of the conventional use of lacing/cable fastening means for boot liners. It would have been obvious to use the fastening system of Hammerslag on conventionally laced boot liners as shown by Bouvier to provide zonal adjustability/customization for an inner boot liner.

### ***Response to Arguments***

8. Applicant's arguments filed 11/16/05 have been fully considered but they are not persuasive.

In response to applicants' arguments directed towards the location of the rotatable closure line lock in reference to the closure line looping point, the Examiner has attached a marked up copy of figure 15 of Hammerslag to show how such limitations are being read and applied to the reference.

### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3728

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
